

Smartovate — Company Profile

Overview

Smartovate (سمارتوفيت) is an AI and Cloud solutions company that helps organizations, students, and professionals adopt artificial intelligence and cloud computing through tailored software development, consulting, and training. The company positions itself as a Microsoft Partner delivering digital transformation services, with a strong focus on practical, hands-on enablement rather than theory alone.

- **Founded:** 2024
- **Headquarters:** London, England
- **Company size:** 11–50 employees
- **Industry:** IT Services and IT Consulting
- **Work model:** Primarily remote; the team is distributed and works from multiple locations
- **Website:** www.smartovate.com
- **Specialties:** Artificial Intelligence, Cloud, Cloud Computing, Infrastructure, Web Development, Internet of Things (IoT)

Mission

Smartovate's mission is to help businesses, students, and professionals unlock the full potential of cloud computing and artificial intelligence through tailored support, hands-on learning, and real-world implementation. The company supports clients across the full software development lifecycle — from needs analysis to production deployment.

Core Areas of Expertise

Smartovate develops software solutions built on AI and cloud technologies, designing applications adapted to clients' business needs through automation, data processing, and artificial intelligence. Its main service areas include:

1. **Web Development** — custom web and mobile application development
2. **Artificial Intelligence (AI)** — AI integration, consulting, and multi-agent systems
3. **Cloud Services** — deployment, management, and training for Microsoft Azure and AWS
4. **Internet of Things (IoT)**
5. **Cybersecurity & Cloud Infrastructure**
6. **Technical Training** — for students and organizations

Smartovate — Leadership

Dr. Abdelkhalek Bakkari — CEO and Founder of Smartovate. His stated specialties include multi-agent systems and generative AI. He is professionally active in the AI/startup ecosystem, including:

- Officially ISO/IEC 27001 Lead Auditor certified (August 2025)
- Represented Smartovate at COMEX 2025 (Oman Convention & Exhibition Centre, September 8–11, 2025), showcasing the company's AI-powered solutions
- Selected as a Miro Meetups Ambassador, reflecting Smartovate's commitment to fostering innovation and collaboration; through this role he hosts meetups and helps professionals and students leverage Miro for design, learning, and collaboration

Organizational Structure

Smartovate's organizational structure is built around three founding roles:

- **Abdelkhalek Bakkari — CEO & Founder** — Visionary leader driving AI innovation.
- **Taoufik Baccari — COO & Co-Founder** — Focused on operational excellence and seamless delivery.
- **Sausan Al Suti — CTO & Co-Founder** — Described as the technical mastermind behind cutting-edge solutions.

The COO and CTO both report directly to the CEO & Founder, forming a three-person founding leadership team at the top of the company.

•

Flagship Product: Subul (also referred to as SUBUL)

Subul is Smartovate's flagship AI-powered platform, combining EdTech and HRTech. It is designed to guide students and professionals through personalized career orientation, skill development, and employability enhancement.

What Subul offers:

- Personalized learning paths and mentorship opportunities
- Career exploration, upskilling, and access to internships/project opportunities
- Data-driven insights for institutions to support talent development
- AI-guided task management (prioritization support)
- Interactive smart tours that turn knowledge into immersive experiences
- Real-time collaboration and progress insights
- Hands-on labs, certifications, and career-readiness resources
- Voice AI features (via Deepgram and Cartesia integrations) aimed at use cases such as enabling insurance agents to sell and communicate more effectively from anywhere

Subul is also referenced under an expanded name, "Smart Unified Blended Universal Learning," and has been formally accepted as a project by the Équipe Projets Transverses at Paris Panthéon-Assas Université, reflecting an academic partnership focused on hybrid learning innovation.

A discounted access program (70% off, via promo code) has been run in partnership with SecuriNets FST to help students and tech enthusiasts access Subul and accelerate their readiness for the job market.

Certifications & Compliance

ISO/IEC 27001 — Smartovate has pursued and achieved alignment with ISO/IEC 27001, the leading international standard for Information Security Management Systems (ISMS). Key points:

- As an integration platform connecting SaaS companies with financial tools across Europe, Smartovate handles sensitive, high-value data streams (accounting, banking, invoicing) even without storing customer data long-term.
- Certification reflects an implemented ISMS aligned with international best practice, effective risk management, documented incident-response/access-control processes, and successful independent audits.
- Positioned as proof of ongoing commitment to security, not a one-time compliance exercise.

Talent & Internship Programs

Smartovate runs structured student engagement programs, notably:

- **Stage d'Été & PFA 2026** — an internship program opening 34 exclusive internship topics for summer 2026, with free access to AWS and Microsoft Azure environments for hands-on experimentation. Focus themes include:
 - AI & Autonomous Agents
 - Cloud Security & Governance
 - Infrastructure & Networking
 - DevOps & CI/CD
 - Data & Machine Learning
 - Cloud Native & Serverless
- **PFE (Projets de Fin d'Études)** — a showcase of final-year engineering student projects completed at Smartovate, spanning AI, AI Agents, Cloud, DevOps, and immersive technologies (VR/AR/XR).

Partnerships, Programs & Recognitions

Smartovate has been accepted into or recognized by numerous startup and technology partner programs, reflecting active ecosystem engagement:

- **Microsoft ISV Success Program** — official member, leveraging Microsoft's cloud ecosystem and resources; also received a strategic nomination within the Microsoft for Startups ecosystem.
- **Cloudflare for Startups** — awarded \$5,000 in Cloudflare credits, adopting Cloudflare's Zero Trust security and edge computing (Workers) tools.
- **Stripe** — integrated Stripe into its technology ecosystem.
- **International Artificial Intelligence Industry Alliance (AIIA)** — official member.
- **SkilledSphere** — listed as one of the impactful companies shaping the GCC's digital future.

- **Black Ambition Prize** — Top 40 finalist (out of thousands of applicants) for the Black Ambition Prize founded by Pharrell Williams, competing for up to \$100K in growth funding.
- **IPHatch® 2025** — selected startup, working with two Nokia patents (via Piece Future) to support its innovation roadmap.
- **IPHatch® UK 2025** — Winner, an open-innovation program enabling startups to scale by integrating patented technologies from major corporations; supported by Piece Future, Scottish Enterprise, and City of Glasgow College.
- **Manus for Startups** — accepted into the program to help scale Subul's AI-guided task management and collaboration features.
- **Deepgram Startup Program** — accepted; integrating Deepgram's voice AI to enhance Subul's productivity and communication features, particularly for distributed sales teams (e.g., insurance agents).
- **Cartesia Startups Grant Program** — selected; integrating Cartesia's voice AI infrastructure into Smartovate's AI agents.
- **Atlassian for Startups** — accepted; gained access to Jira and Confluence to structure internal work tracking, plus mentorship from the Atlassian startup ecosystem.
- **Cyber Horizon 2.0** — partnered as sponsor/supporter, providing opportunities and Subul access to participants.

Events & Community Engagement

- **COMEX 2025** (Oman Convention & Exhibition Centre, September 8–11, 2025) — Smartovate showcased its AI-powered solutions, represented by CEO Dr. Abdelkhalek Bakkari.
- **Agentic AI Conference** by Data Science Dojo (September 15–19, 2025) — attended to engage with AI thought leaders on emerging trends and tools.

Company Culture

Smartovate describes itself as a remote-first company that prioritizes flexibility, using technology to keep a distributed team connected and enabling employees to work from any location.

Summary Positioning

Smartovate is an early-stage (founded 2024), London-headquartered AI and Cloud company . It combines direct client services (AI/cloud consulting, web and mobile development, cybersecurity, technical training) with its own EdTech/HRTech product, Subul, aimed at career development and workforce upskilling. The company has built credibility through a dense network of technology and startup ecosystem partnerships (Microsoft, Cloudflare, Stripe, Deepgram, Cartesia, Atlassian), an ISO/IEC 27001-aligned security posture, and recognition in competitive startup programs (Black Ambition, IPHatch® UK 2025 winner).
